Batterie-Systeme

„The Power of the Fuze“

60th Annual Fuze Conference
May 11th, 2017
Harald Wich
Diehl & Eagle Picher GmbH

Overview

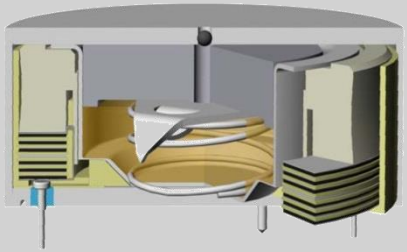
DIEHL & EAGLE PICHER
Batterie-Systeme

- History, the large Calibre Fuzes
- Requirements
- Challenges
- Miniaturised Fuze Batteries
- New Test Equipment
- Conclusions

Legacy Fuze Batteries

DIEHL & EAGLE PICHER
Batterie-Systeme

- PS115 (lead)
- MOFA post launch
- DEP 1400x series

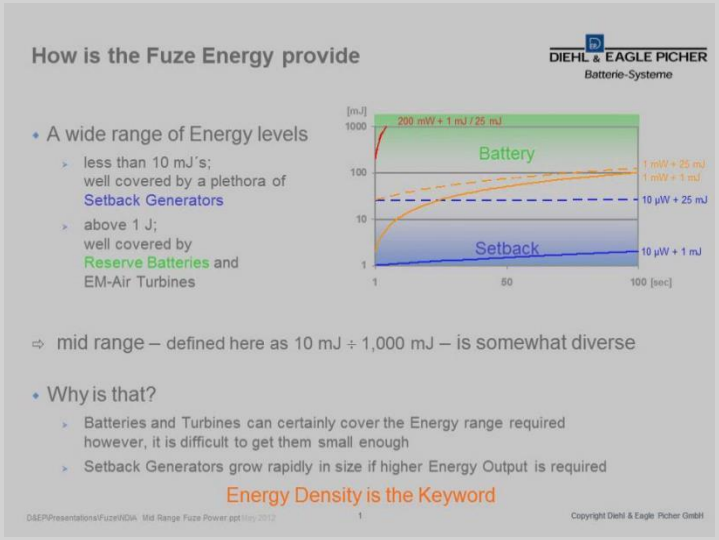


- Requirements
  - Power 1 – 5 W
  - Energy 200 – 500 J
  - Life time < 200 s
  - Rise time > 100 ms

The “Onset”

DIEHL & EAGLE PICHER
Batterie-Systeme

- In our 2011 presentation …



we have analysed the requirements …

… and proposed a small Fuze battery

The Start

DIEHL & EAGLE PICHER
Batterie-Systeme

- Naively we thought …
  - substitute a 5 – 10 mJ set-back-generator
  - with a 100 mJ fuze battery
  - ¼ the size of the generator

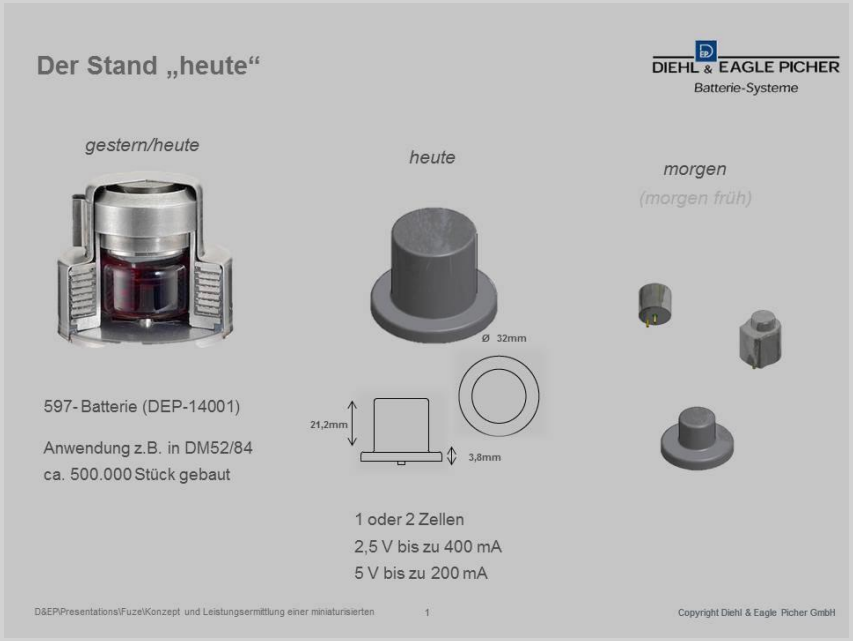
is not a big issue

we used to build Artillery/Mortar-Fuze Batteries
with 10,000 times more Capacity

just reduce the diameter by a factor of 3

and

the height by factor of 2.5



Customers Challenge

DIEHL & EAGLE PICHER
Batterie-Systeme

- Our 2014 presentation …

Power Supply

DIEHL & EAGLE PICHER Batterie-Systeme

- All new electronic Subsystems are
  - Low voltage 1.7 - 8.5 V*
  - Low current 5 - 110 mA*
  - ⇨ Low power 10 - 300 mW*
- Typical combinations for medium caliber

P_{Peak} = 50 - 500 mW

flight times of 10 - 20 sec sum up to E = 0.5 - 10 J

- Sophisticated Power management is required to lower Energy

* for the examples shown

Electrical data

Voltage: As high as possible to reduce current. We are thinking 3-4 cells in series (if possible).
Minimum voltage level TBD

Energy: Shall 0,5 Joule, Should 1 Joule

Activation Should 50 msec, Shall 100 msec (min 300 mJ delivered at this time to capacitor)

Type of load: DC/DC converter (switching type). Up to 10 W can be consumed by the converter for a short time.

supplemented by DoD 2014.1 SBIR

rise time	< 10/100 ms
current	> 2/40 mA
voltage	> 2.9 V

our customer survey

Anforderungen/Randbedingungen

Bottom Line

DIEHL & EAGLE PICHER
Batterie-Systeme

- Requirement “Challenges/Highlights” *

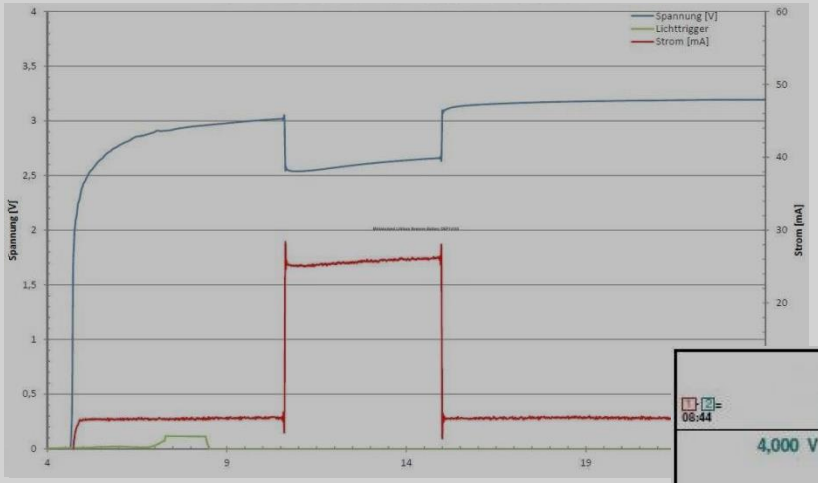
Voltage	as high as possible
Energy	hundred´s of mJ
Power	most of the Energy within ms some W´s
Current	hundred´s of mA
Rise time	almost instantaneously t_r = close to zero
Life time	up to 60 s
Environment	spinning and none spinning

* fortunately not all cumulative

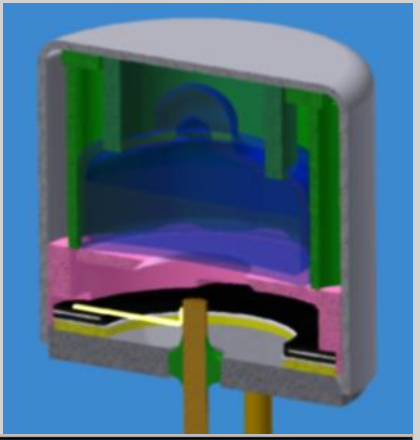
Our first small Battery

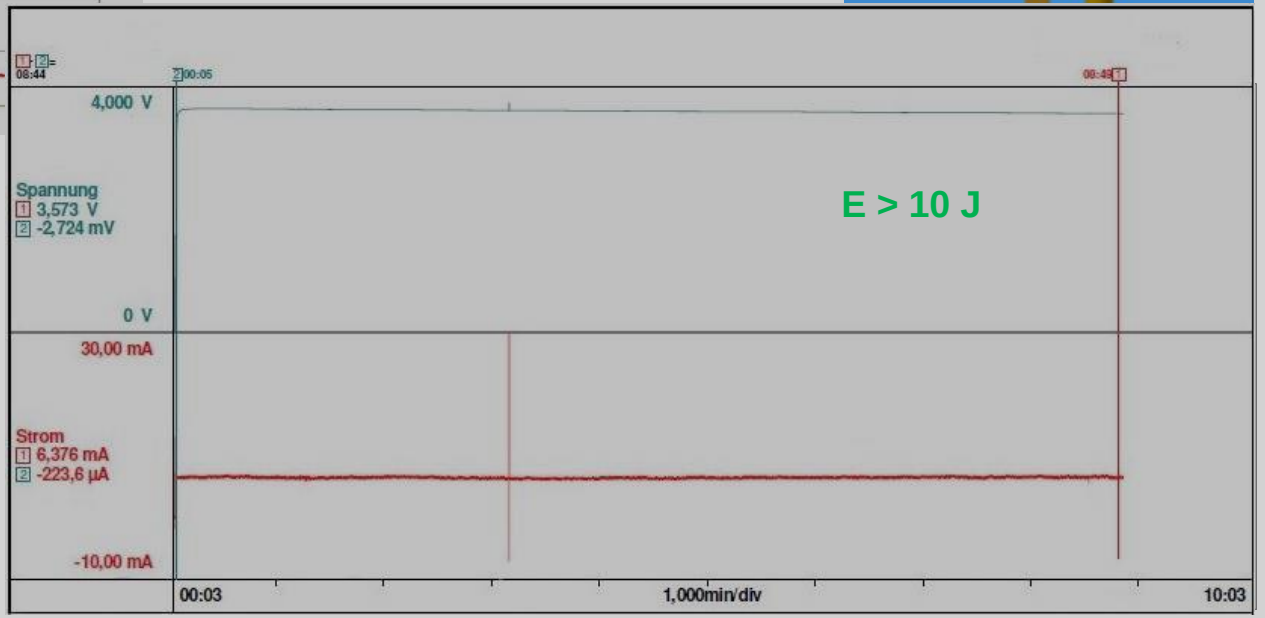
DIEHL & EAGLE PICHER
Batterie-Systeme

- High Acceleration (no/low spin)



DEP 14103
at -46°C

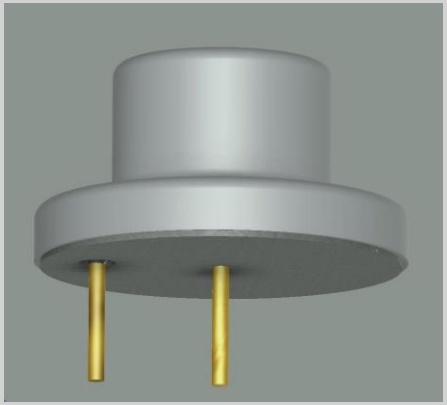


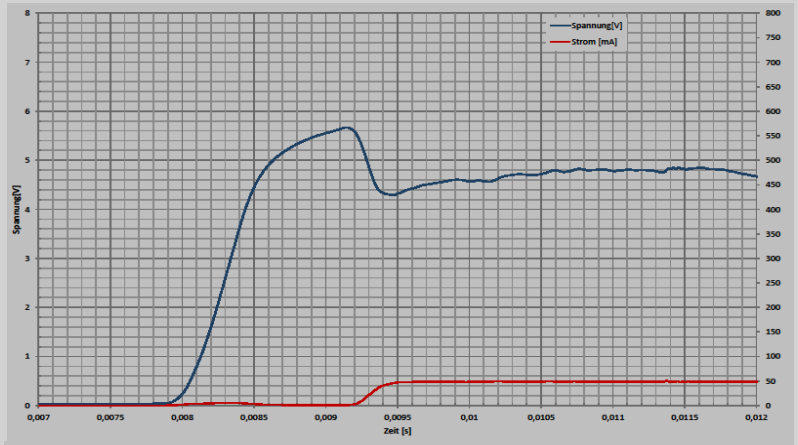


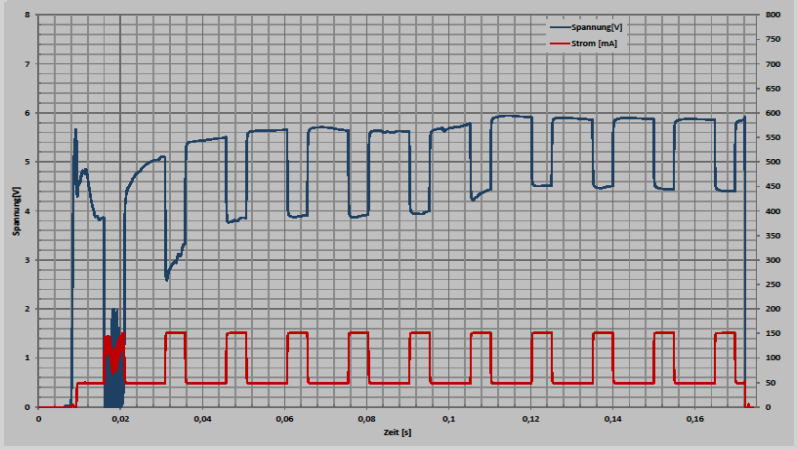
The next small Battery

DIEHL & EAGLE PICHER
Batterie-Systeme

- DEP14202.01







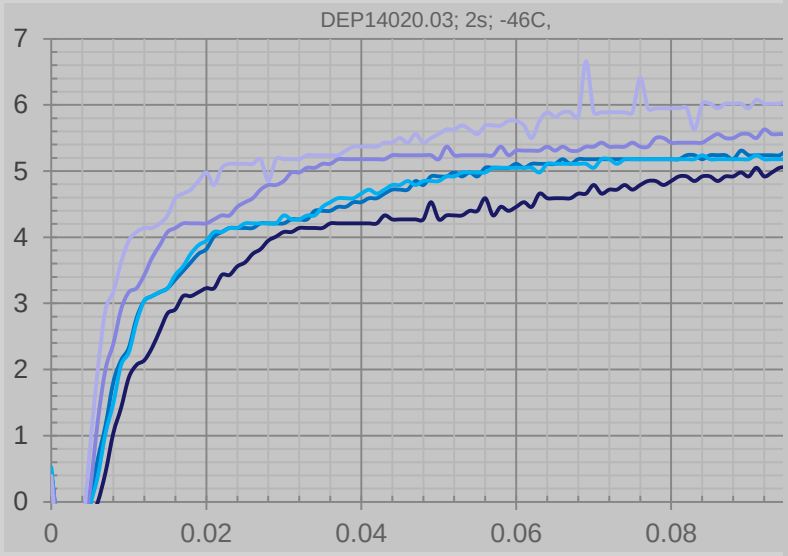
reflecting new customer requirements

DEP14202.z; -46°C, spin

Early Voltage/Power Capability

DIEHL & EAGLE PICHER
Batterie-Systeme

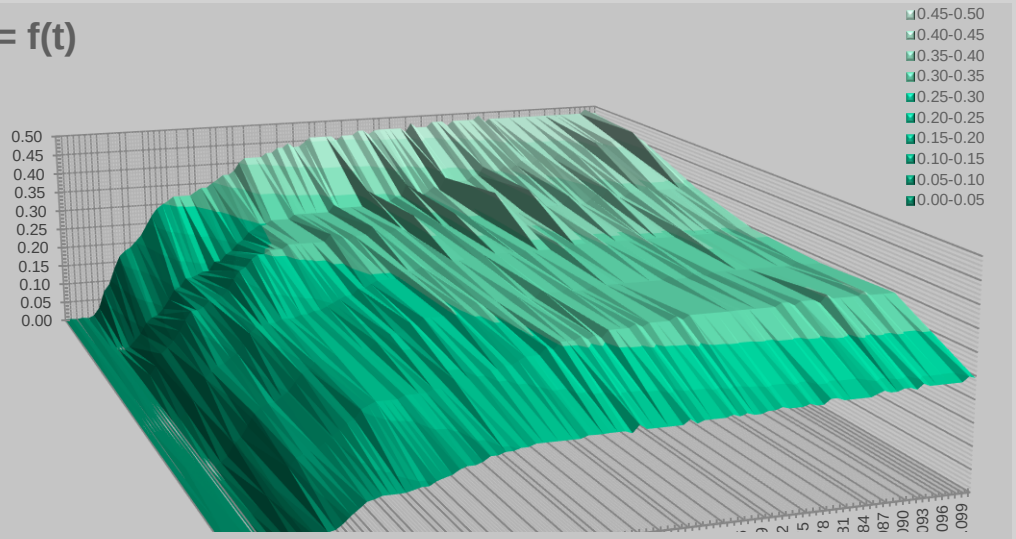
- Load-Test



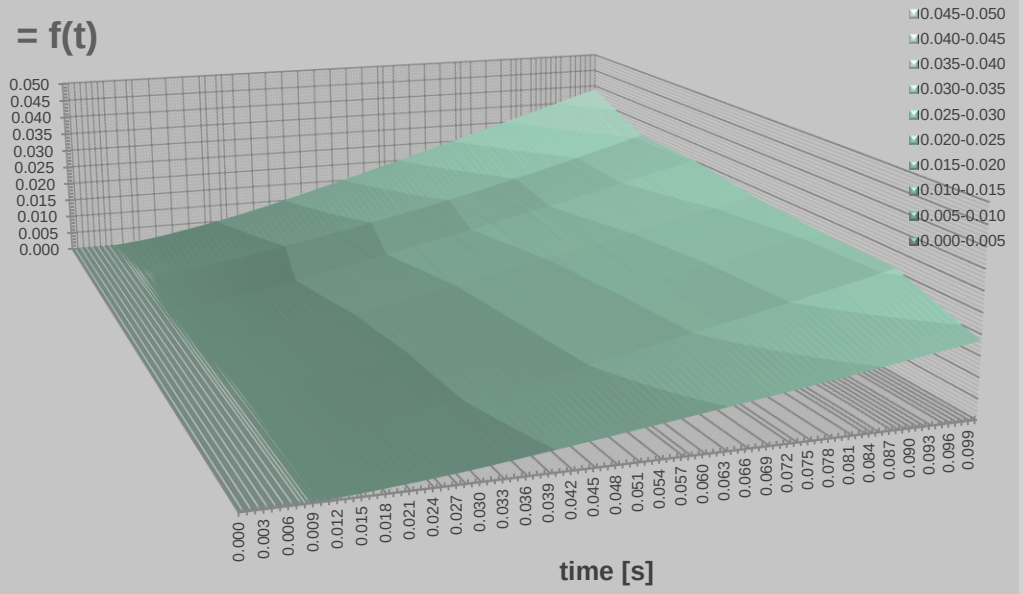
2s Battery

P ≈ 500 mW/cm^2 @ 100 ms
E ≈ 40 mJ/cm^2 until 100 ms

Power = f(t)



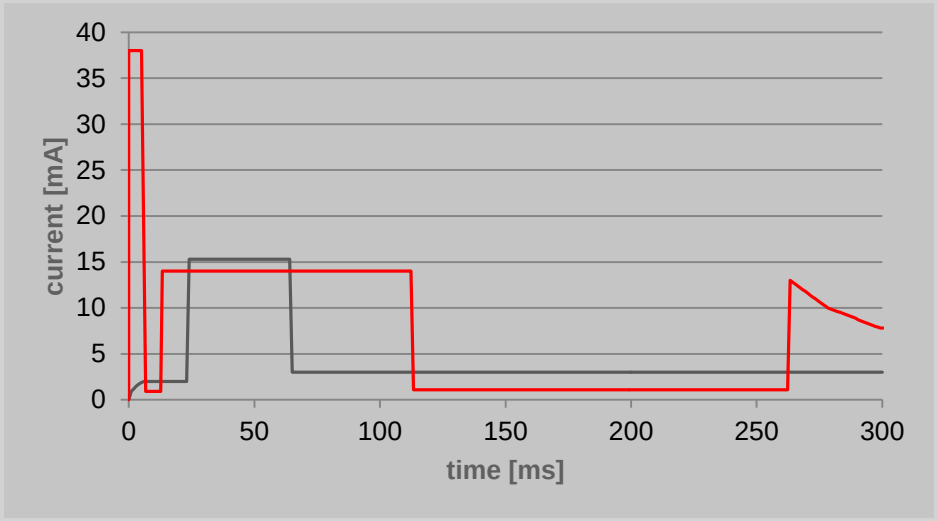
Energy = f(t)

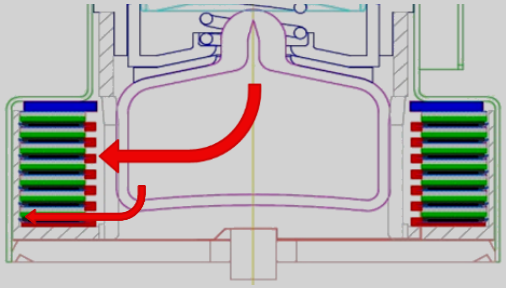


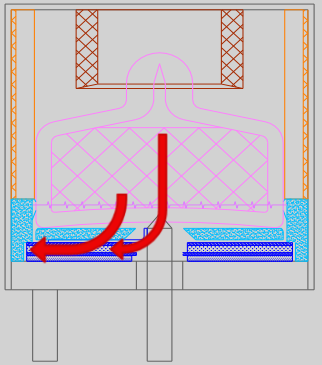
Load Management

DIEHL & EAGLE PICHER
Batterie-Systeme

- Load Profile





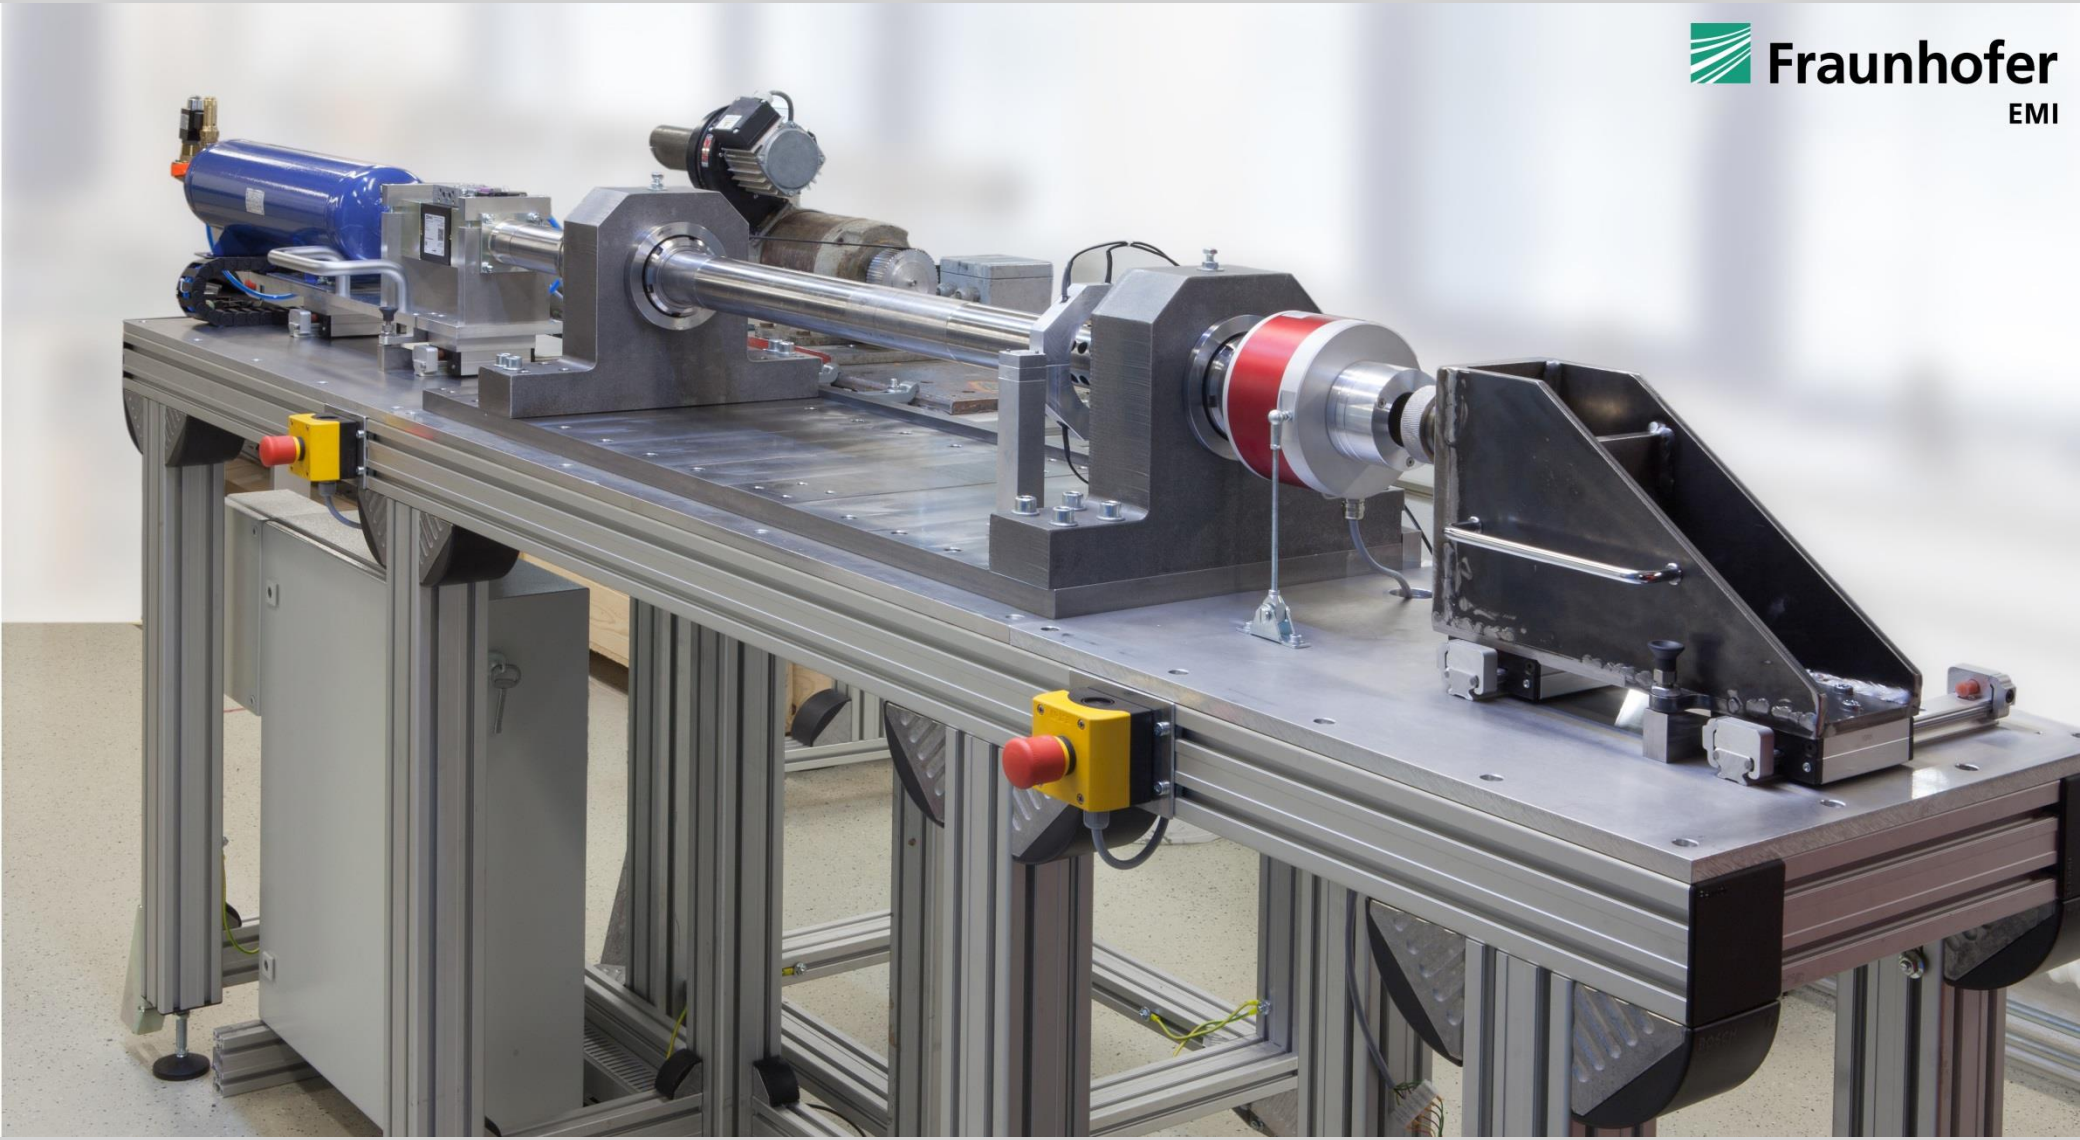


- avoid (delay) high current until battery is sufficiently activated
  (electrolyte has reached the place where it is supposed to be)
- high capacitive load can be even worse
  (remember: empty capacitor is a “short circuit”)

New Lab-Test-Equipment

DIEHL & EAGLE PICHER
Batterie-Systeme

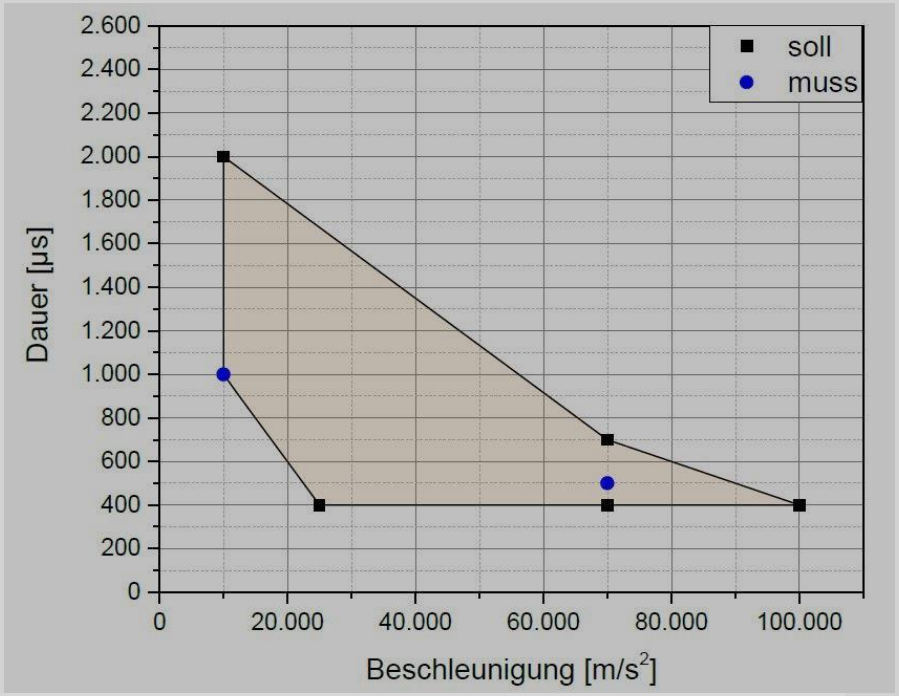
Fraunhofer
EMI

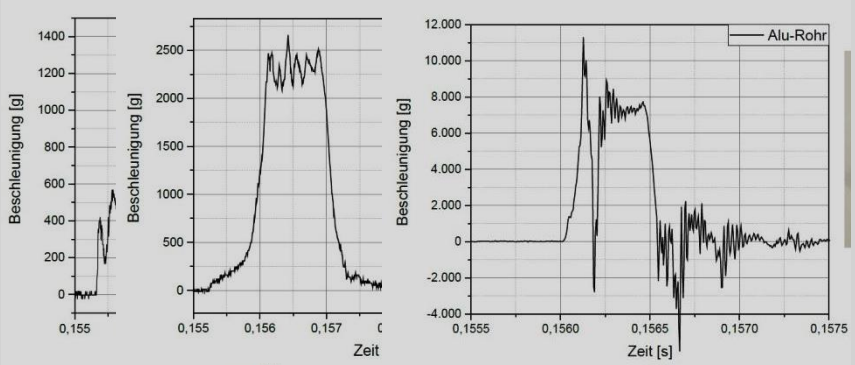


New Lab-Test-Equipment

DIEHL & EAGLE PICHER
Batterie-Systeme

- External Load Panel (e.g. Maccor) or Customer Breadboard
- Synchronised Load and Data Recording
- Spin Rate up to 18,000 rpm
- Test-Time up to 500 s
  (actually unlimited)

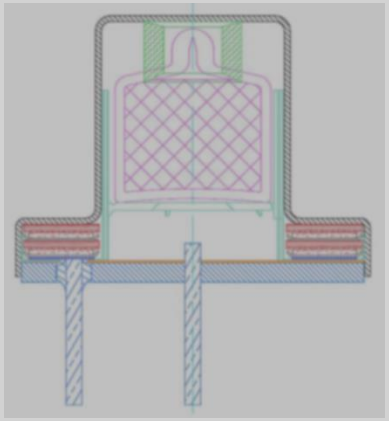


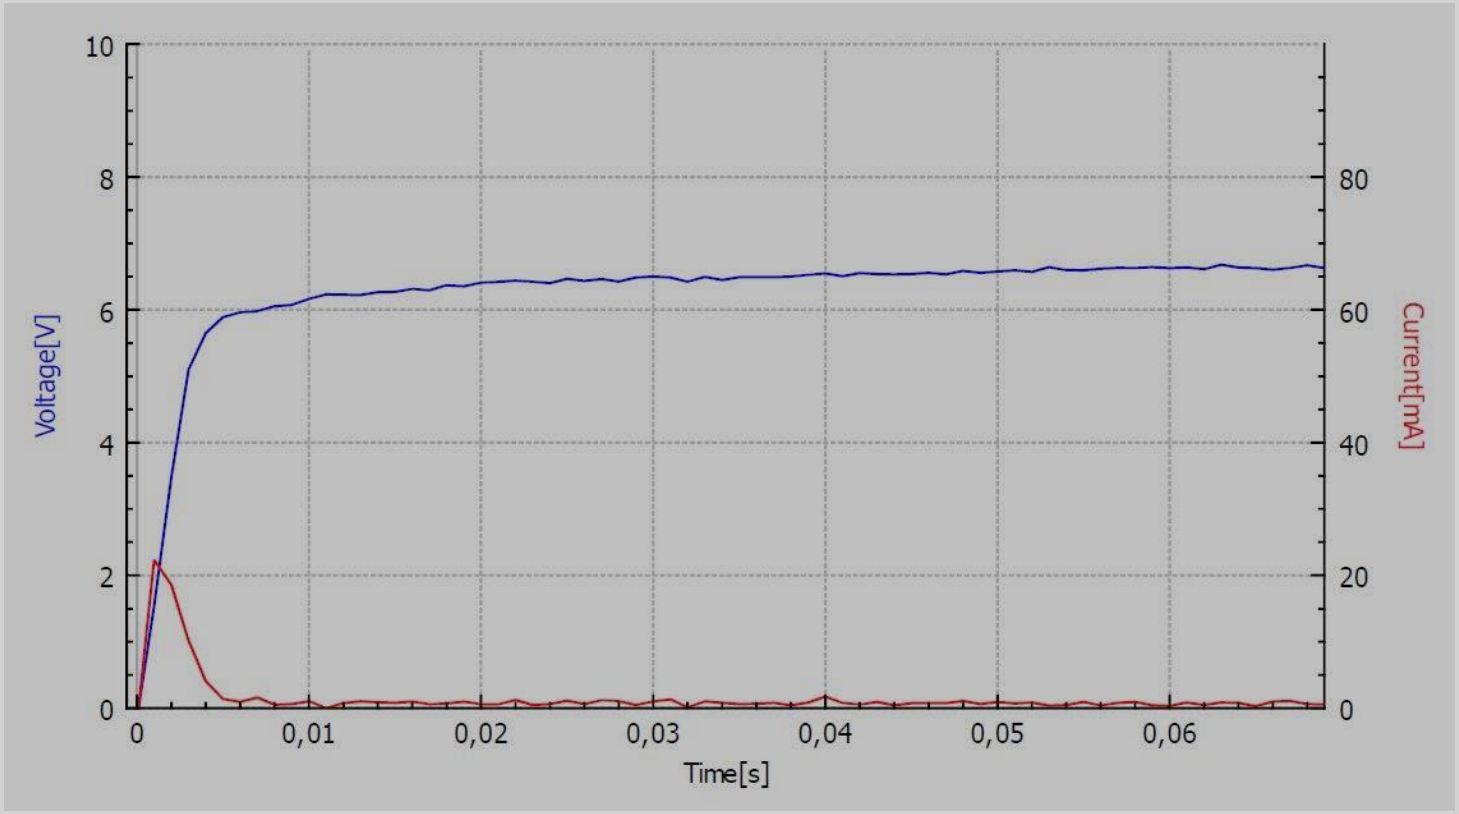


First Results

DIEHL & EAGLE PICHER
Batterie-Systeme

- DEP14202.**02**
  = none spinning mod of DEP14202.01





Conclusion

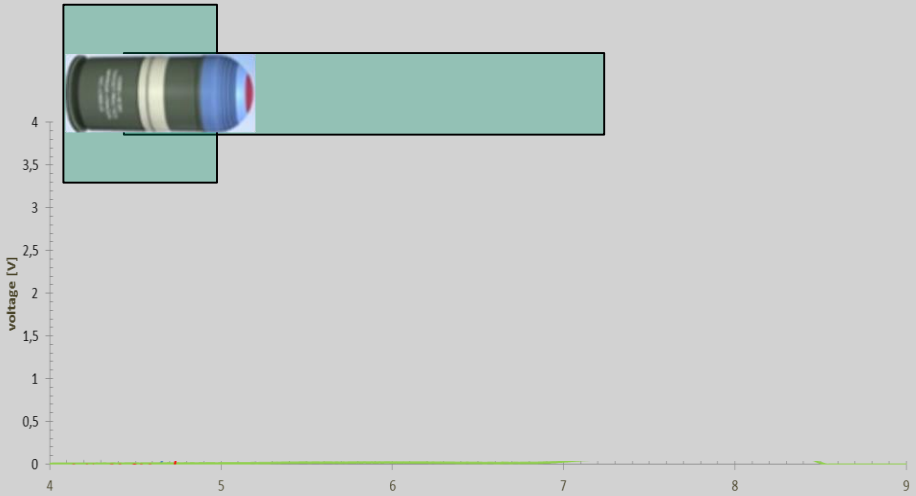
DIEHL & EAGLE PICHER
Batterie-Systeme

- Lithium Reserve Batteries provide very short Activation Time
  - under high forces
    - Acceleration
    - Spin
  - if properly designed
  - under proper load management

Conclusion

DIEHL & EAGLE PICHER
Batterie-Systeme

- Lithium Reserve Batteries provide very short Activation Time
  - under high forces
    - Acceleration
    - Spin
  - if properly designed
  - under proper load management



Lithium Reserve Batteries are able to provide “In-Barrel” Power!

DIEHL & EAGLE PICHER
