"It's important to me to work for a company where I can **really make a difference**. That's why I am with Diehl."

MAKE IT WORK HAPPEN

Cloud Infrastructure Engineer (m/f/d)

These are your tasks:

• Operating and continuously improving a secure cloud landing zone in Microsoft Azure

• Evaluating and consulting on customer requests regarding feasibility, best practices and security concerns of cloud workloads

• Developing, maintaining and deploying Terraform/ OpenTofu scripts to automate infrastructure setup

• Implementing customer requests regarding network and access management in Azure

• Creating and updating technical documentation

• Stay up-to-date with the latest cloud technologies and trends

Who we are looking for:

• Proven experience as a Cloud Infrastructure Engineer or similar role

• Proficient in Azure technology stack IaaS

• Proficiency with infrastructure-as-code tools like Terraform/OpenTofu

• Experience in Git, Azure DevOps and scripting languages such as Python, Bash, or PowerShell

• Excellent problem-solving skills and attention to detail

• Self-motivation so that you take responsibility for your work and see projects through to completion

• Strong English communication skills, both written and spoken

• Ability to work both independently and in a team
